

SLOW DOWN AROUND SCHOOLS

Keep our children safe

Speed around schools is a major road safety issue. Speed is not just about exceeding the posted speed limit; it is about going too fast for the conditions. **SLOW DOWN** and help the school keep their students safe.

We all know children can get very excited heading back to school so be a considerate, patient and careful driver near schools or where students walk or cycle to school. **Never call your child across the road.**

Take extra Care and be Aware

Leave your car at home?

When the weather is good see if you can get your children into healthy travel habits. Provide them with support and encourage them to walk, cycle, bus or scooter to school.

If you are unsure about their safety, do some practice runs as a family during the weekends or before the school term starts. If you have time, spend the first week going with them to and from school.

Be safe, be seen
